PROFESSIONAL SUMMARY

IT Support and Technical Support professional with B.Sc. Computer Science and PGDCA, and experience supporting live office systems, networks, databases and web applications. Skilled in Windows and Linux troubleshooting, hardware and network support, incident diagnosis and resolution, vendor coordination, and secure digital record keeping. Technical background in SQL, Power BI, Python scripting and Git, with a strong focus on keeping systems running reliably, documenting issues clearly and working with users, clients and vendors to resolve them.

SKILLS

- **IT Support and Troubleshooting:** Incident diagnosis and resolution, Windows, Linux, system configuration, software installation, user account support, hardware and printer support, network troubleshooting, vendor coordination
- **Scripting and Programming:** Python scripting, JavaScript, C, C++, Git
- **Data, Analytics and Databases:** SQL, Power BI, Firebase Realtime Database, database handling, data security practices
- **Application Support and Testing:** Debugging, bug fixing, functional testing, application maintenance, problem diagnosis
- **Web Development:** React.js, Django, HTML, CSS, Tailwind CSS, Firebase authentication, responsive design
- **Documentation and Communication:** Digital documentation, records management, user assistance, technical support, written communication

PROFESSIONAL EXPERIENCE

Technical Assistant | Ayyankunnu Grama Panchayath **July 2025 - July 2026**

- Provided IT support for desktops, printers and the local network, resolving hardware, software and connectivity issues for office staff.
- Troubleshot Windows and Linux problems, configured systems, installed software and handled user account support.
- Diagnosed faults and resolved incidents, coordinating with vendors on IT maintenance and infrastructure needs.
- Maintained accurate digital records and followed data-security practices to keep office information organised and protected.

Web Developer | IMC Business Solutions **December 2024 - July 2025**

- Built and maintained responsive web applications using React.js, JavaScript, HTML, CSS and Tailwind CSS.
- Integrated Firebase for database management, authentication and real-time functionality; supported backend integration with Django and Python.
- Debugged, tested and improved the performance of existing applications, resolving defects found during development.
- Worked with team members and clients to understand requirements and resolve application issues.

Junior Software Developer Intern | Soften Technologies **August 2022 - January 2023**

- Assisted with software development, application maintenance, debugging, testing and troubleshooting.
- Contributed to project development and documentation, working with the team to identify and fix technical issues.

PROJECTS

Web and Systems Applications

- Developed responsive business web applications using React.js, Django, Python and Firebase, including authentication and database workflows.
- Integrated backend functionality and debugged applications throughout development.

EDUCATION

Post Graduate Diploma in Computer Applications (PGDCA) **2023 - 2024**

B.Sc. Computer Science **2018 - 2021**

CERTIFICATIONS

Certified Python Programming **2022 - 2023**

LANGUAGES

English, Malayalam, Tamil
